

所在。

“向管理要效益”,这是国企迷茫、压抑多年后发出的口号。市场的无情运作终于拨动了企业管理这根久已尘封的弦。

随着我国轮胎企业由“橄榄形”向“哑铃形”的转变,进一步精简机构、强化管理,以市场为支点、开发为依托进行高效优质生产是现代企业的标志,也是中国轮胎工业重塑辉煌的起点。

(3) 增强自主开发能力

与众多其它工业一样,中国轮胎工业发展的主要瓶颈还在于自主研发能力。在过去的几十年里,一直坚持以我为主、兼收并蓄的方针发展自己的核心技术能力,这是宝贵的生存发展之道。

“全球化”的经济浪潮使发展中国家的传统工业只有依靠自身研究开发能力的不断提高才能免除被吞没而沦为外方生产加工基地的厄运。

“不管踩着什么样的高跷,没有自己的脚走路是不行的”,只有尽快形成一批代表国际先进水准和主流技术的企业群体和自主知识品牌,我国的轮胎工业才能最终屹立于民族工业之

本工作得到上轮公司阿克隆研究分部的帮助,在此表示感谢。

Trend of tire industry in 21st century

LONG You-ming

[Shanghai Tire and Rubber (Group) Co., Ltd., Shanghai 200072, China]

Abstract: The history of tire industry, the trend of global tire industry and the present status and future of China's tire industry are briefly described. The automobile industry demands more radial tire, speed tire and tire with lower profile; and the green tire with low noise and fuel consumption will be the primary tire design in the future. The China's tire industry is developing rapidly. The performance of famous brands made in China is a match for the imported tires, and their prices are much lower than the latter's. The smaller factory size, unreasonable product type structure and less brand advertisement are the main problems in China's tire industry. It is important for China's tire industry to establish a modern enterprise management system and enhance the ability of developing new products to accommodate the globalization trend of tire markets.

不充气内胎

中图分类号:TQ336.1⁺² 文献标识码:D

由康宁业申请的专利(专利号 99222495, 公布日期 2000-01-26)“不充气内胎”,其特点是由数个橡胶制成的环形片状实体组成,这些

实体分为受力片、补助力片和膨胀片,它们之间有一定间隙,实体外缘与外胎内侧形状相匹配。不充气内胎的优点是防刺扎、防爆破,不需充气,弹性好,安装维修方便,使用寿命长。
